PRESS RELEASE

Münster, July 2007

ChartBox presents two new DVD-players with HDX4-support

Videos in HDX4-format are teeny-weeny, yet they show very best quality. ChartBOX therefore expands the DIFRNCE-product range to include two new DVD-players, which are certified for this modern video format. DF-DVD 4020 and DF-DVD 5010 allow playing PC-stored videos in the home theatre.

The German Jomigo company developed the HDX4 Movie Creator, software, which most effectively compresses videos. This means that movies can be condensed to that extent that one no longer requires a DVD but only a CD for storage – without appreciable loss of quality.

HDX4-movies are based on MPEG-4-format, which is further compressed. HDX4 gains growing acceptance and what is more, allows the space-saving transfer of complete movies to mobile phones, PSP, iPod or PDA. The HDX4-format also has a great future ahead in home movie entertainment. For instance it is possible to play PC-converted camcorder movies, ripped video-DVDs or movies from the Internet on a normal DVD-player. These DVD-players only have to support the HDX4-format.

ChartBox: 2 new DVD-players of the DIFRNCE-product line

In the Benelux-countries, ChartBox is a well known supplier of MP3/MP4- and DVD-players. With the HDX4-certified DVD-players of the DIFRNCE product line, ChartBox now also conquers the German market after having already been successful with innovative iPod- and Bluetooth-products.

The DVD-players DF-DVD 4020 and DF-DVD 5010 of the DIFRNCE-product line offer numerous advantages. One is certainly the fact that they support the innovative HDX4-format and can play correspondingly compressed videos.

DIFRNCE DF-DVD 4020 is a 2-channel-DVD-player, which can handle the music- and video formats HDX4, MPEG4, DVD, DVD +/- R/RW, CD, CD-R/RW, WMA, MP3, SVCD, VCD and JPEG. Available outputs are Progressive Scan, SCART, S-Video, Coaxial and Stereo (Cinch). The device supports multi language subtitles and sound reproduction. The DVD-player is extremely compact and thanks to its small dimensions only requires minimum space in the living room cabinet. A remote control is included in shipment. It costs between 39.00 EUR and 49.00 Euro.

DIFRNCE DF-DVD 5010 supports the same formats and provides the same outputs as the "little brother". What is different is the more filigree design. In addition, the DF-DVD 5010 is equipped with the 5.1-channel sound system, which means it can easily handle modern cinema-DVDs and guarantees perfect surround-sound in the living room. The device is available for 49.00 EUR to 59.00 EUR.

HDX4 Movie Creator – test now

HDX4 Movie Creator is recommended as complete solution for playback and creation of digital videos on the PC. A free-of-charge test version is available for download from the Homepage. The full version only costs 39.90 Euro.
