## PRESS RELEASE

Münster, August 2006

# Video Software HDX4: The Silver Screen for your pocket!

**The video software "HDX4 Movie Creator" sets completely new standards for the home theatre business. HDX4 takes already existing movies and converts them into the ultra-compressing MPEG-4 format. These freshly created files are tiny in comparison to the original material, without sacrificing quality for size. In addition, these movies can also be played on a variety of mobile devices.**

Jomigo GmbH from Münster presents the complete video solution HDX4. It makes the big pictures shrink - just in size, but not in quality. Faster, smaller, better: HDX4 does the next step into a new dimension of video technology and makes a whole new range of target devices accessible.

It is a known fact that multimedia fans have to go to great lengths to store movies in adequate digital form. Usually, each movie is huge and occupies several gigabytes of storage space on a hard disk or DVD. But this is history: The HDX4 codec identifies itself to be the long overdue solution for all compression-stricken multimedia fans.

### **HD-ready home made**

The HDX4 Movie Creator can use DVD-Videos and separate video files in a number of different formats as input for the conversion process. The encoder shrinks your videos in record time, to subsequently save them in a format that can be played back on a PC as well as on standalone DVD players, your mobile phone, a Sony Playstation Portable or even an Apple iPod.

HDX4 relies on the modern MPEG-4 technology (ISO/IEC14496-2) for compressing video data, which guarantees constantly high picture and audio quality at minimal bit rates. HDX4 allows you to compress a whole DVD, for example your holiday footage, down to the size of a single recordable CD. All this is done while setting the pace for concurrent products and preserving the quality of the original material.

HDX4 can work with all common picture resolutions, even up to HD formats of 1920x1080 pixels. Of course, all legacy formats like PAL, NTSC, several wide screen formats, CIF and QCI are supported as well. You can even decide to encode in user defined resolutions without any problems.

### **Move your videos to mobile phones, PSP and iPod**

HDX4 gets rid of the sits-at-home phenomenon and makes people go outside again. The mobile market is one of the core markets of HDX4, because it enables people to move their favourite movies onto their mobile phones, PDAs, iPods or Sony PSPs. It is not a problem

anymore to take your movies with you, wherever you go, on a variety of modern devices and without frustrating incompatibilities.

HDX4 is also an excellent tool for playback. The separate HDX4 player with the powerful HDX4-Decoder can work with older video formats as well as current ones and plays your private videos smoothly even on older, less powerful computers. On top of all this, the player is also compatible with other modern codecs, such as DivX or XviD, and other multimedia formats, like MP3 or OGG.

### **The core features of the HDX4 Movie Creator in short**

- Compatible with formats like MPEG-1, MPEG-2, VCD, SVCD
- Can parse DVD-Video, DVD+VR and DVD-VR
- Handles various MPEG-4 files, as well as 3GPP- and MP4-Containers.
- Imports all AVI files that are supported on Windows platforms
- Creates HDX4 (MPEG-4) output with support for all known MPEG-4 compatible profiles
- Writes output data in AVI, MP4 and 3GPP 1/2 containers
- Supports various 4CC codes for best compatibility
- Creates videos for mobile phones in 3GP format
- Creates video files for Sony PSP, Apple iPod (including video models), other mobile gaming consoles and portable video players
- Supports optional output file splitting
- Supports a wide variety of MPEG-4 profile settings with import and export functionality for pre-defined and user profiles
- Writes video files to CD and DVD
- Ships with pre-defined profiles that are optimized for speed and quality
- Ships with a player for playback of all video and audio files
- High-performance HDX4 codec for guaranteed high video conversion speed

### **Everybody is invited to test it**

Both, HDX4 Movie Creator for creating videos and HDX4 Player for playback of videos in a magnitude of formats are available as "try before you buy" downloads. Everybody is invited to download the 30 days trial versions from the web site <http://www.hdx4.com> for free. Prices are EUR 19.00 for the HDX4 Player and EUR 39.90 for the full HDX4 Movie Creator package. *(3685 characters, released free of charges for print)*
